Bengaluru-560076

Motivated MCA graduate with a strong foundation in programming, web designing, and software development and software Testing. Quick learner with a passion for building efficient and scalable applications. Eager to apply technical skills and grow in a dynamic IT environment.

Education

Master of Computer Application (MCA)-July 2026
Kishkinda University, Ballari, Karnataka CGPA:9.41
Bachelor of Computer Applications (BCA) – Sept 2024
Shree Medha Degree College, Ballari, Karnataka CGPA: 8.71

Certification

- Explore Machine Learning using Python by Infosys Springboard
- Introduction to data Visualization by simple learn

Skills

- Programming: **Python, Java(Object-Oriented Programming)**
- Database: **SQL, MongoDB**
- Web-Designing: **HTML, CSS, JavaScript (Basics), ReactJs**
- Software Testing: **Manual Testing, Regression Testing, Testcase Design & Execution, STLC, SDLC**
- Data Visualization: **MS Excel, Microsoft Power Point Presentation (PPT), Canva**
- Software & Tools: **MySQL Workbench, Antigravity, MongoDB Compass, Anaconda (Jupiter Notebook), VS Code, MS Excel**

Internship

Data Science & Machine Learning Intern-YBI Foundation | [January 2026 – May 2026]

- Developed machine learning models using Python and Scikit-learn.
- Performed data preprocessing, Visualization, and analysis using Pandas and Matplotlib.
- Built prediction models and evaluated their performance using standard metrics.

Projects

KU SMARTSCHEDULE – AI-BASED UNIVERSITY TIMETABLE GENERATOR

Tools Used: **Python (Flask), React.js, MongoDB, Google Gemini AI, VS Code**

- Developed an AI-powered timetable management system for Kishkinda University.
- Built a full-stack web application using Python, React.js, and MongoDB.
- Automated timetable generation by avoiding faculty, classroom, and subject scheduling conflicts.
- Implemented secure login and role-based access for administrators and faculty.
- Contributed the project to the university as part of my MCA major project to improve timetable management and reduce manual work.

HOUSE RENTAL WEB APPLICATION - END-TO-END MANUAL TESTING

Tools Used: **Microsoft Excel, JIRA, Google Chrome, MySQL, Microsoft Word**

Performed end-to-end manual testing of a House Rental Web Application by designing and executing test cases for modules including User Registration, Login, Property Listing, Property Search, Property Details, Booking Request, User Profile, Contact Owner, Admin Dashboard, and Logout. Identified and reported defects, verified bug fixes through regression testing, and followed SDLC and STLC processes to ensure the application's functionality, usability, and overall quality.
